About us

Simple Delivery LTD was established in 2018; at the time, the delivery industry seemed saturated and a cake nearly impossible to get a slice of. Simple Delivery initially ventured into the network to start and progress into a leading competitor amongst the best delivery/courier companies in the UK. 2 years later; the journey continues, the aspiration remains with a slight twist. We now work together with some of the UK's leading delivery companies, such as DPD. We also recruit drivers for other service providers, tailoring our services to their needs and ensuring a stringent and seamless recruitment process seeking only the best! In such a short time, we have developed and gained remarkable feedback from our partners and customers. Due to this extremely valuable acknowledgment, we need more people to join our excelling team. We have work readily available for you on a contractual and flexible basis. We just need you!

'We make the simple things look simple'
